Reconstructed First Settlers List for Hussenbach (Linevo Osero)

August 2014
As many people know, a First Settler’s List for Hussenbach has not been found. The village was one of 17 that were not included in Dr. Igor Pleve’s *Einwanderung in das Wolgagebiet 1764-1767* series. I have attempted to reconstruct a list of people who were probably the First Settlers of Hussenbach. I used Pleve’s: *Lists of Colonists to Russia in 1766: Reports to Ivan Kulberg;“* Dr. Brent A. Mai’s: *1798 Census of the German Colonies along the Volga: Economy, Population, and Agriculture, Volumes 1 and 2; Transport of the Volga Germans from Oranienbaum to the Colonies on the Volga 1766-1767;* Mai and Marquardt’s: *German Migration to the Russian Volga (1764-1767): Origins and Destinations; Combined Surname Index to All Volumes of Einwanderung in das Wolgagebiet 1764-1767* by Igor Pleve compiled by Brent Alan Mai, and Femling’s website: "Budingen Marriages 1766."

I first ran a report on my Hussenbach database searching for all residents with birth dates prior to 1800. I came up with a list of 158 surnames that were born before 1800. From the appendix in Beratz I knew I was looking for 118 families. Starting with the *1798 Census* I was able to determined some of the families that had moved out of or into the village. I was also able to determine if the couple may have arrived as married or were married after they arrived by using the date of birth or an approximation. If the date of birth was unknown I used the approximation of 18 years prior to the birth of the first child for a male and 16 years for a female. Yes, I understand there were exceptions to this but I could estimate that they were born at least before or near this date. Then I compared this list to the *Combined Surname Index* and I was able to eliminate more families as I compared them to the entries in other villages in *Einwanderung*. Then I searched through the *Lists of Colonists to Russia* for matches to my list of names and then cross referenced them to the actual entry in the book. I began to see patterns emerge, many of the Hussenbachers travelled together, they were concentrated on only a few of the ship's lists. When the entry was similar, for example Johann and wife Anna from Darmstadt, I would usually pick the one on the same ships list with other Hussenbachers, especially from the lists with Vorsteher Hussenbach and Vorsteher Kreutzer. It was mainly a process of elimination, if they were found on a First Settlers List and had a matching Kulberg entry they couldn’t be on my list. Using the above resources I was able to come up with 116 probable families. The list has more entries because I listed the females separately when the maiden name was known, even though they may have arrived as a married couple. This will facilitate the next step of discovering their origins in the German Nations of 1766, Poland and other countries. Questions, corrections or comments are Welcome.

    Unique person, not able to connected to Messer Brauer. In Messer, Wilhelm is the son of the deceased Michael Brauer, and living in the household of Johann Meng.
    A possibility is that she is a sister to the BRAUER's in Messer: Peter, age 18 in 1767, Wilhelm, age 11 in 1767.
    Ponder, since the father is deceased, Peter has married and is living on his own, Catharina Margaretha Brauer has been married off to Philipp Maurer in Hussenbach and Wilhelm lives in the Meng household.
